

Installation guide - wooden blinds

Please find enclosed appropriate brackets and screws for either top fix or face fix.

Fixings

- 2 x end cover brackets (marked LH and RH)
- 1 x centre support (if over 1600mm)
- 4 x screws (6 with support)

For **inside recess** blinds a 12mm deduction has been made for easy fitting.

Method of Fitting

Your blinds were made to be fitted either outside the recess or inside the recess. Please follow the instructions that apply to your blind. For inside recess blinds a 12mm deduction has been made for ease of fitting.

Inside recess

Outside recess

Mounting the brackets

The mounting brackets may be mounted using the screws provided in several different orientations depending on your needs - see illustration.

Installation guide - wooden blinds

Measure for fitting

When fitting outside recess first measure cassette box with brackets on. Then mark the areas where you intent to fit, and screw the brackets in place (with catch facing out). For inside recess position right hand / left hand brackets into recess where fitting and mark holes, drill, place plugs and fit brackets. When brackets are in place slide head cassette box into the brackets. When brackets are in place slide head cassette box into the brackets horizontally. Secure by clipping the catches over - see illustration.

Valance

With your wood venetian blind you will be provided with a valance to cover the front of the cassette box. This attached simply by velcro.

Valance returns for outside recess

A mitred valance for the returns will be supplied if you requested blinds fitted outside the recess. When measuring for outside recess please note that the mitred returns will add an additional 16mm to the overall blind size.

Operating your blind

Tilt (single cord acorn). To tilt your slated blind pull either of the single acorn cords.
Raise or Lower (Multi-cord Acorn). Slats should be fully open, not tilted when raising or lowering. To raise the blind pull the cord straight down and lock by pulling cords to the right. To lower the blind pull the cords towards the left of the blind and slowly raise your hand while holding on to the cords. Move the cord back to the vertical position and the cord lock holds the blind position.

Cleaning

We recommend routine dusting with a soft brush, cloth or alternatively clean the, with a vacuum cleaner brush attachment. If blinds become soiled, they may be cleaned with a soft cloth dampened with warm water. You may want to add a small amount of mild, non-abrasive liquid soap to the warm water. We advise you to utilise professional window treatment cleaning services if you have elected to have your blind cleaned by methods other than those suggested above.
